

**Continuous Protection,
Permanent Prevention®**

An innovative solution for health prevention

The Viraschutz innovative solution maintains any indoor space safe **24/7 for 3 months** with a **99.99%** antimicrobial residual efficacy, and a **98%** reduction on chemical use.

ISO certified and patented

The Viraschutz system

1. Formulations

2. Application devices

3. Certification

1. Formulations

Sequentially applied, our proprietary formulations generate an invisible, long-lasting antimicrobial coating, molecularly bond to surfaces.

Ablator

The primer that maximizes the adhesion of the coating on any surface.

Halos

The formulation that generates the antimicrobial coating, which covalently binds with surfaces.

Novator

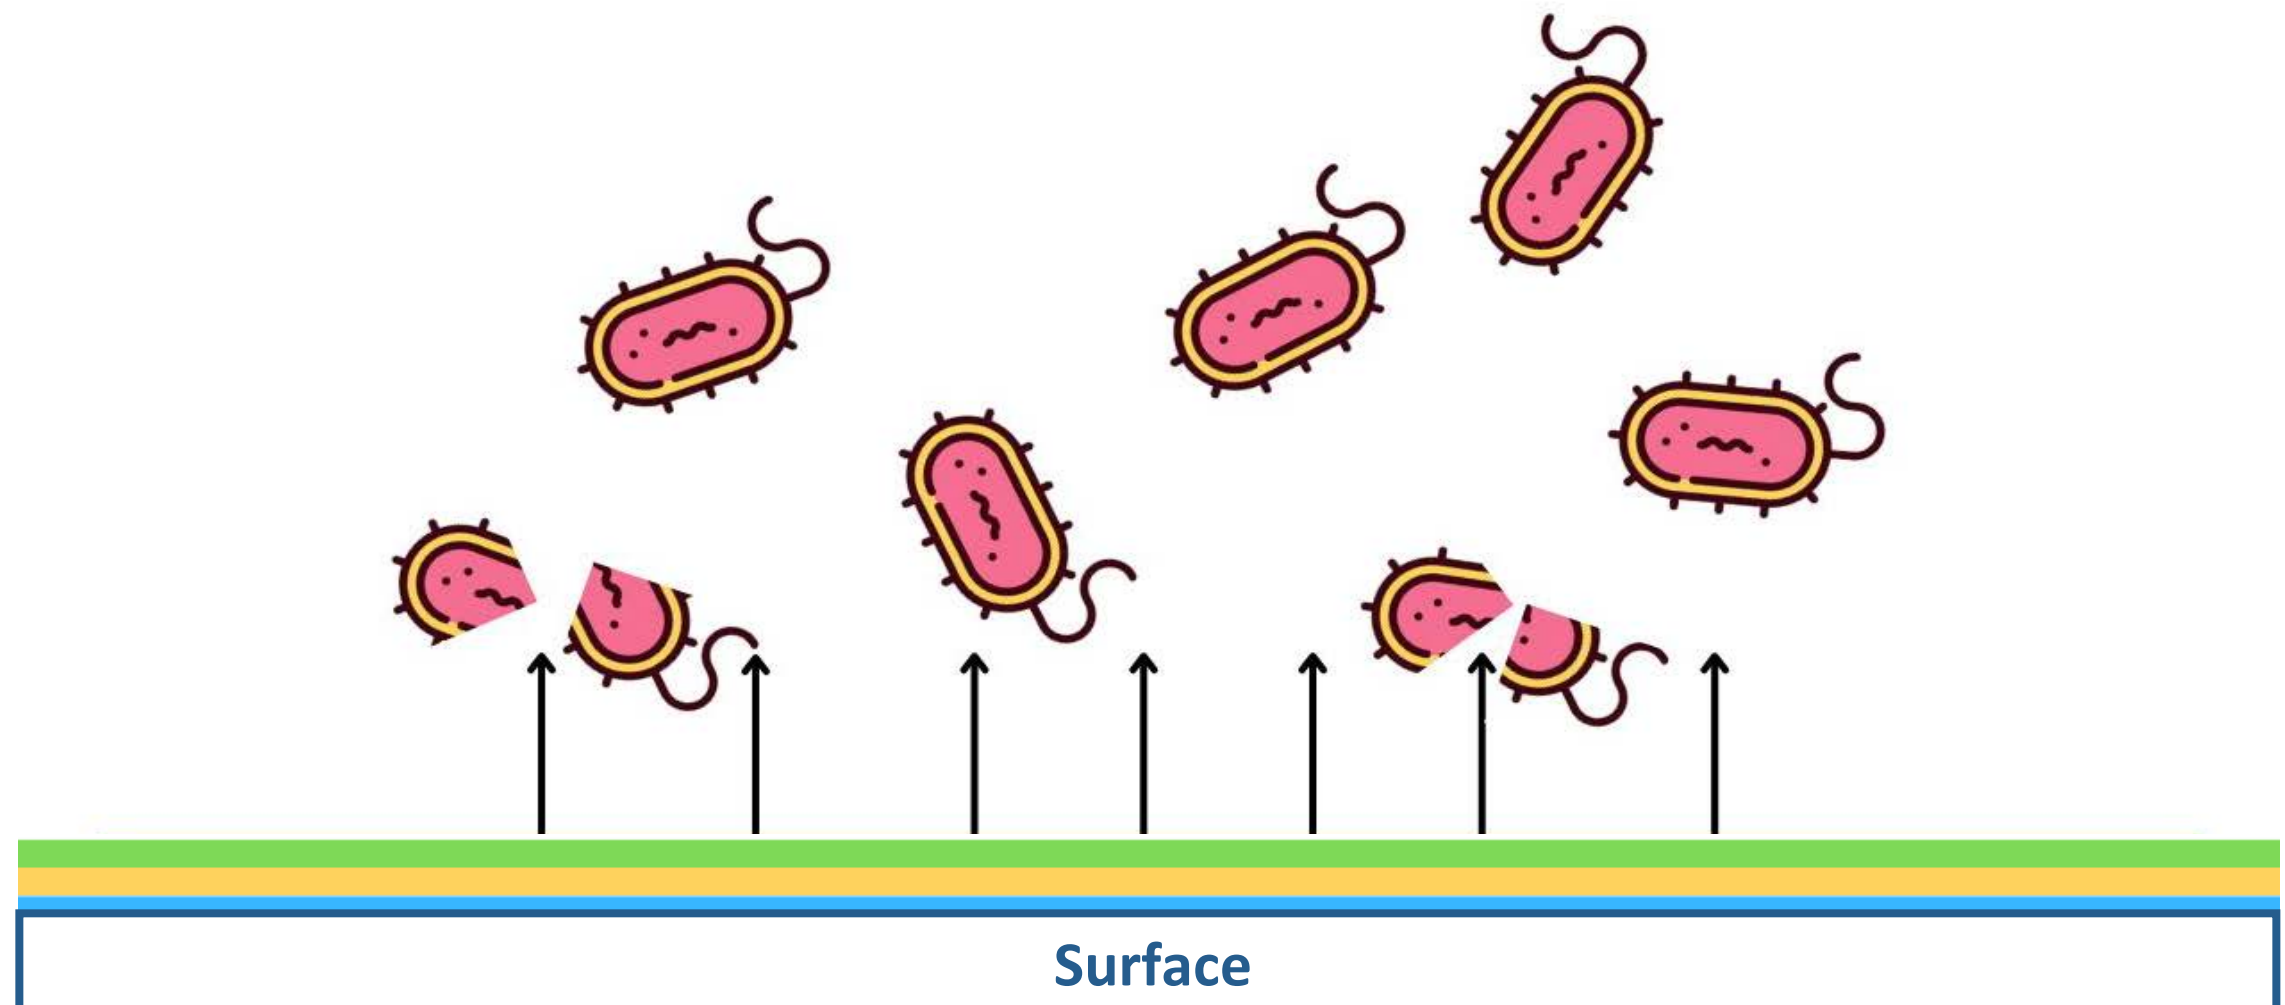

The enhancer that maximizes the antimicrobial efficacy of the coating and its duration over time.

Surface

The Viraschutz coating

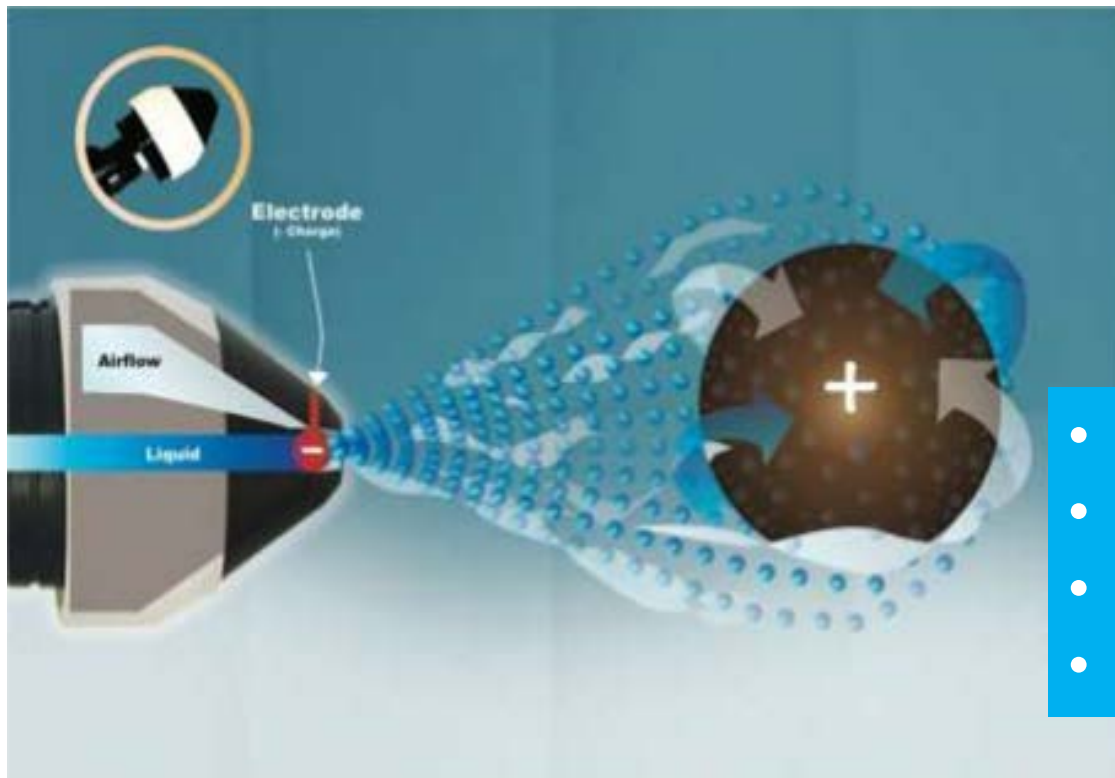

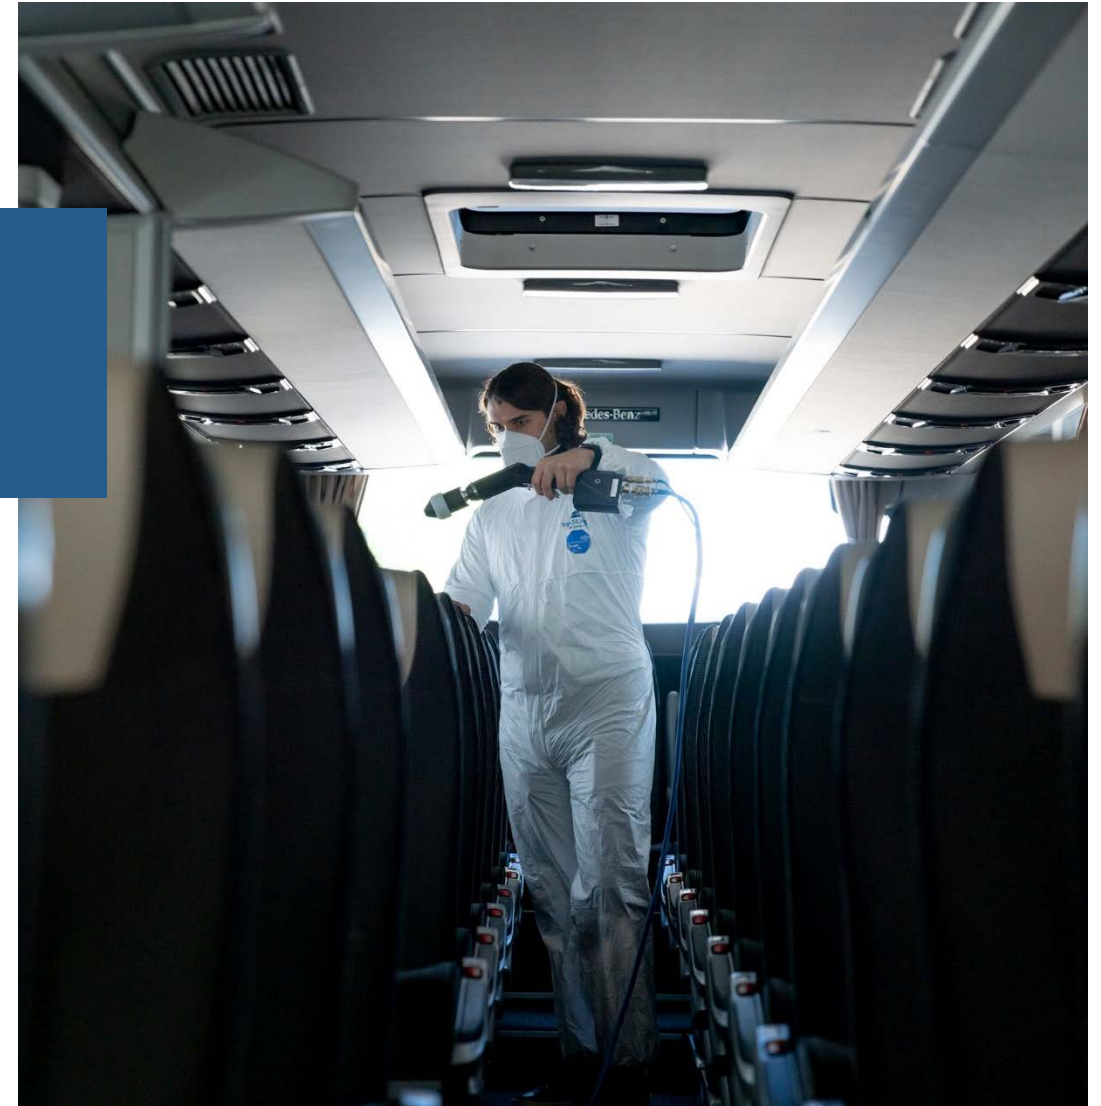

The coating attracts pathogens by electrostatic action and kills them on contact. The micro spikes physically puncture and inactivate the pathogens' cells.

The **physical action** avoids the development of bacteria resistance to antimicrobials (AMR) and the biofilm generation.

2. Application devices

Ablator, Halos and Novator are applied with specifically tuned professional electrostatic sprayers, tested by the US EPA.

- 360° surface coverage
- Fast applications
- No dripping and no dispersion of product
- No need to free up spaces

Application process

Pre treatment
cleaning

Step 1 - Ablator

10' drying time

Step 2 - Halos

10' drying time

Step 3 - Novator

10' drying time

Spaces are accessible again

Test case

1000 sqm

90 minutes

2 operators

2 liters each product

(Drying time included)

Viraschutz Certified Program

"A proof of reliability, a demonstration of care"

The VCP is a set of marketing material released to the client.

The QR code lands to a dedicated page showing information about the Viraschutz treatment.

Moscati Hospital

We want you to be protected in our premises with

VIRASCHUTZ®
ever protected.

The unique solution to prevent microbial attacks, ALWAYS:

99.99% efficacy for 90 days
Protection 24/7

Coating applied on 2022/09/18
Next application 2022/12/18

Continuous protection, Permanent prevention

98%
reduction on
chemical
products use

A new level of care

Science-based technology

Tested in operational environments,
ISO certified and patented.

Sustainable choice

98% reduction on chemical
and plastic tanks use; reduction on
staff exposure to chemicals.

Cost-effective solution

Less expensive,
more efficient and safer than
current disinfection procedures.

Marketing tool

The VCP gets across the message
“always safe spaces” to everyone,
generating a competitive advantage.
